Education

● Associate Degree of Computer Engineering

Isfahan University
2019-2021

● Web Development
The Odin Project
2022-present

● Bachelor's degree of Computer Engineering

Islamic Azad University
Central Tehran Branch
2024-2026

Skills

- **JavaScript**
- **React.js**
- **Webpack, Vite**
- **HTML5 & CSS3**
- **Python**
- **Django**
- **MySQL, SQLIte**
- **Troubleshooting & Debugging**
- **Bash Scripting**
- **Git & GitHub**
- **Linux (Ubuntu)**
- **Data Structures & Algorithms**

Experience

● **Full-stack Developer**

Freelancer   May 2023 - present

Advanced To-Do List

This project is a demonstration of practical web development techniques using the Module Pattern and Webpack for bundling. Implemented local storage to ensure user data is saved and available on subsequent visits.The application is fully functional, allowing users to manage their tasks effectively with a variety of features.

CV Builder

CV Application is a React-based web app designed to help users easily create a basic CV. It allows users to input personal information, education, and work experience, which is then dynamically rendered as a CV preview. Users can also export their CV as a PDF using the jsPDF and html2Canvas libraries. The project is built using Vite for fast builds and includes icons from React Icons with FontAwesome integration for a modern look.

Online Learning Platform Project

Contributed to backend development using Django, implementing new features such as automated email notifications to keep learners informed about deadlines and a dynamic display of the company's YouTube data on partners' dashboards. Additionally, I enhanced the UI, prioritizing a more intuitive and user-friendly experience to better engage learners and partners.

Weather App

This is a simple weather forecast web application that allows users to search for weather information for specific locations. The UI of the app changes based on the weather data, including background image and weather icons.

System Health Check Python Script
Assess the health of computer systems. The script performs various checks, including pending reboot status, disk usage, and network connectivity. It provides real-time feedback on critical system metrics, enabling proactive maintenance and troubleshooting.

Hash Map Implementation
HashMap project offers efficient key-value pair storage and retrieval with constant-time complexity. It enables swift insertion, retrieval, and deletion operations, alongside key presence checks and array access for streamlined data management.

● English Instructor
Gooyesh Language Institute   Jul 2021 - Aug 2022

- Taught English language skills to students at various proficiency levels.
- Implemented effective classroom management techniques to create a conducive learning environment.
- Provided constructive feedback to students to enhance their language proficiency.
- Collaborated with colleagues and administration to support the overall educational objectives of the institute.
